## MIDDLE EAST FIBERGLASS INDUSTRIES L.L.C

Incorporated in 2005, Middle East Fiberglass Industry has years of experience in manufacturing high quality fiberglass products for various industries including Oil & Gas, Marine, Power generations, Construction and Water treatment. At MEFI, we make it mandatory that every aspect of the customer's needs is catered to its best, ensuring quality products and services.

Our focus is to provide clients with professional manufacturing services that surpass expectations and product requirements. To achieve our aim, we incorporated innovative manufacturing principles to improve and streamline the development of premium-quality products in the most time and cost-effective means possible.

We design and manufacture customized technical solutions for the improvement of our client productivity and service. Our primary objective is to be with our client, to track the best solution for their internal market. Many times, the optimal solution may be different for different clients. Because of this, we analyze all these factors, and together, we track down the optimal solution.

### Quality Policy

We will strive to provide quality products and services which consistently meet and surpasses the standards set by our customers.

We will achieve these goals by pursuing excellence in the application of a management system & the achievement of the quality objectives.
